RE Reconnaissance Level Characterization Report (RLCR) and Pre-Demolition Survey Report (PDSR) for Building 668 - Concurrence for Type 2 Facility Designation and PDSR Approval

Dear Mr Legare

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has received and reviewed the PDSR for Building 668, Revision 0 dated September 18, 2003 (received on October 8, 2003) and Version 1 dated October 31, 2003, received on November 10, 2003. The Version 1 PDSR was provided after additional investigation was performed due to concerns raised during consultative meetings. Based on the information contained in the Version 1 PDSR, we are hereby approving the PDSR for B668 and providing concurrence with the Type 2 Facility designation for B668.

It is indicated that this PDSR is being provided to Type this building per the DPP. However, the DPP (Decommissioning Program Plan) specifically identifies that the Buildings will be Typed through the performance of a Reconnaissance Level Characterization and subsequent RLCR, which was not specifically provided for B668. However, we believe the information provided in this PDSR is sufficient to make the determination that B668 is a Type 2 facility as indicated, without performing and providing a specific RLCR for our concurrence. Although we are allowing this deviation from standard procedure and the approved characterization process, this should not be considered a precedent for future characterization actions.

It is also our understanding that the concrete slab will be cut in half, with the contaminated western half being disposed as LLW and the eastern half disposed as sanitary waste or as otherwise characterized. As also stated in the PDSR, none of the slab will be recycled on site.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Krueck at (303) 692-3328.

Sincerely,

Steven H. Gunderson
